0 = balanced, 10 = strongly biased/manipulative

POLITICAL SPECTRUM

Classification based on Chapel Hill Expert Survey (CHES) 2024

The Chapel Hill Expert Survey (CHES 2024) is an academic survey of 609 political scientists in 31 countries. Each party is rated on a scale from 0 (far left) to 10 (far right).

Party	Green	SNP	Lab	LibDem	Con	Reform
CHES	1.85	2.90	3.50	4.60	7.30	8.80
Spectrum	Left	Left	Left	Center	Right	Right

The overall tendency is presented on a 0–10 scale (0 = strongly left-favoring, 5 = balanced, 10 = strongly right-favoring). The calculation is based on the difference in average favoritism of left vs. right parties (grouping per CHES 2024).

TENDENCY (L – R)

7.1 / 10

BROADCAST INFO AND TOPIC FRAMEWORK

Programme Data

- Title: Unidentified Australian broadcast programme (likely Sky News Australia or similar)
- Date: Not specified in filename; content references post-October 7, 2023 period
- Estimated Length: Approximately 8 minutes (00:00–08:05)
- Presenter/Reporter: Unidentified female presenter (Australian accent, references "our own ABC")

President: Schlaepfer, David - **Contact:** kontakt@SVFAB.ch - **Address:** SVFAB, P/O-Box, CH-8021 Zurich 1

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

- Persons Interviewed:

Actors	Function	Party/Affiliation	Political Spectrum
Trevor Asserson	Senior Partner, Asserson Law Offices; author of BBC bias report	Private legal practice; pro-Israel advocacy research	Centre-right to right (estimated 7.0–8.0)
Presenter (unnamed)	Television journalist/anchor	Australian broadcaster (likely Sky News Australia)	Right-leaning (estimated 7.0)

Main Topic

A one-sided interview with lawyer Trevor Asserson promoting his report alleging systematic anti-Israel bias in BBC coverage of the Israel-Hamas war, framed as an indictment of publicly funded broadcasters generally.

World-View Context

The Asserson report, published in 2024, claimed to identify over 1,500 breaches of BBC editorial guidelines in coverage of the Israel-Hamas conflict following the October 7, 2023 Hamas attacks. The report was commissioned and funded by pro-Israel advocacy interests and was disputed by the BBC on methodological grounds before its full publication. The broader debate concerns whether Western public broadcasters apply consistent standards when covering the Israeli-Palestinian conflict, with critics from both left and right accusing outlets of bias in opposing directions. The segment is broadcast on what appears to be an Australian right-leaning commercial broadcaster, itself with a documented editorial stance sympathetic to Israel and critical of public broadcasting institutions such as the ABC and BBC.

Assessment: Was Each Perspective Addressed?

[A] OMITTED

Timestamp: 05:09–05:46 — Quote: "the BBC criticized the report for its methodology without before they'd read it" — The BBC's position is characterised dismissively by Asserson himself; no BBC spokesperson or written response is presented or quoted directly.

[B] OMITTED

No independent academic media scholar appears at any point in the segment. Assessment: Complete absence of independent methodological scrutiny.

[C] OMITTED

No Palestinian journalist or media representative is given any voice. The segment treats Hamas information control as the only relevant reporting-restriction issue, ignoring Israeli restrictions on foreign press in Gaza.

[D] OMITTED

Israeli government communications strategy and documented press restrictions are not mentioned. Assessment: Structurally one-sided omission.

[E] OMITTED

No perspective arguing BBC coverage has been biased against Palestinians is presented or acknowledged. Assessment: The existence of this substantial body of criticism is entirely suppressed.

[F] OMITTED

No Ofcom representative or independent regulatory voice appears. Assessment: The legal and regulatory framework is discussed only through Asserson's interpretation.

[G] OMITTED

No current or former BBC journalist or editor is interviewed. Assessment: The institution being accused has no internal voice in the segment.

[H] OMITTED

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

No independent statistician or data scientist reviews the quantitative methodology. The data scientists mentioned are described as "mainly Israelis from Israeli universities" — a potential conflict of interest not examined.

[I] OMITTED

No press freedom organisation representative appears. Assessment: The structural conditions of conflict journalism are entirely absent.

[J] OMITTED

No comparative media scholar contextualises BBC coverage against Al Jazeera, Fox News, or other outlets covering the same conflict. Assessment: The comparative framing is entirely absent.

CHAPTER 1 — DETAILED ANALYSIS OF THE 15 CRITERIA

Hard Facts — 9 techniques that are countable and scientifically verifiable

1. EXPERT SELECTION									9/10
1	2	3	4	5	6	7	8	9	10

Expert 1: Trevor Asserson — Senior Partner, Asserson Law Offices	
Timestamp	00:40 onwards
Statement	**I think what's really Behind These breaches and this systemic breaches is a total management failure to control the journalists at the BBC**
Classification	Asserson is a commercial litigation lawyer, not a media scholar, content analyst, or journalism academic. He is the author and commissioner of the report being discussed. He has a documented history of pro-Israel legal advocacy.

Source Depth Check:

(a) FUNDING: The Asserson report was produced by Asserson Law Offices. The funding sources for the report have not been fully disclosed publicly. Asserson has previously worked on pro-Israel legal campaigns. The data scientists described as "mainly Israelis from Israeli universities" represent a potential conflict of interest in a study examining coverage of an Israeli military operation. Structural interest: The report's conclusions align with the advocacy interests of its likely funders.

(b) MANDATE: Asserson's mandate as a litigation lawyer is to construct the strongest possible case for a client position. This is structurally incompatible with neutral content analysis. Litigation methodology, as he himself describes it, is designed to find and catalogue breaches, not to assess overall balance.

(c) CREDIBILITY MATRIX (Source Traffic Light, 6 Dimensions, -2 to +2):

Dimension	Score	Justification
D1 Conflict of Interest	-2	Author of the report under discussion; pro-Israel advocacy background; undisclosed funding
D2 Personal Risk	-1	Reputational risk if report is discredited, but financial and advocacy gains from publicity
D3 Subject Competence	-1	Litigation lawyer, not media scholar or content analyst; methodology is legal, not social-scientific
D4 Opinion Consistency	+1	Consistent pro-Israel advocacy position over career
D5 Emotionalisation vs. Data	-1	Mixes data claims with evaluative superlatives; "unremitting," "totally destroyed"
D6 Source Level	-1	Self-produced report; not peer-reviewed; not independently replicated

TOTAL	-5	SOURCE TRAFFIC LIGHT: RED
-------	----	---------------------------

(c) FACHKOMPETENZ: The presenter introduces Asserson as "senior partner at the Asserson law offices" without noting his advocacy background, the funding sources of the report, or the fact that the BBC disputed the methodology. He is treated as a neutral expert analyst rather than an interested party.

Missing Expert Groups:

- Independent academic content analyst (e.g., from Cardiff University's journalism school, which has conducted peer-reviewed BBC content analyses)
- BBC editorial standards director or Ofcom representative
- Data scientist with no connection to the report to assess the quantitative methodology

Summary (Matrix Result):

Expert	Traffic Light	Key Issue
Trevor Asserson	● RED (Score: -5)	Litigation lawyer with advocacy background presenting self-commissioned report as neutral analysis; no independent verification

2. SOURCE SELECTION									9/10
1	2	3	4	5	6	7	8	9	10

Claims without primary source = penalty points (rumour check)

Source 1: The Asserson Report	
Timestamp	00:00–00:39 — Statement: <i>“research led by British lawyer Trevor Asserson which found that the BBC breached its own editorial guidelines for news coverage more than 1500 times”</i>

- (a) Funding and governance:** Produced by Asserson Law Offices. Full funding disclosure has not been made public. The report was not commissioned by an independent body. The data science component was conducted by “mainly Israelis from Israeli universities” — a potential conflict of interest in a study examining coverage of an Israeli military operation that is not acknowledged in the segment.
- (b) Structural conflict of interest:** The report's conclusions serve the advocacy interests of pro-Israel organisations and the commercial interests of Asserson Law Offices (which has built a profile through pro-Israel legal work). The report's findings are presented as neutral analysis.
- (c) Missing counter-source:** The BBC's own editorial standards reports, Ofcom's assessments, and independent academic content analyses (e.g., Cardiff University's peer-reviewed BBC content studies) are entirely absent.

Source 2: BBC's own response (characterised by Asserson)	
Timestamp	05:09–05:14 — Statement: <i>“the BBC criticized the report for its methodology without before they'd read it”</i>

This is not a direct citation of the BBC's response but Asserson's characterisation of it. The BBC's actual methodological objections are not presented.

- (a) Funding:** N/A — this is a characterisation, not a source citation.
- (b) Conflict of interest:** Asserson has a direct interest in dismissing the BBC's methodological critique.
- (c) Missing counter-source:** The BBC's actual written response to the report is not cited or quoted.

Source 3: "Data scientists" from Israeli universities	
Timestamp	05:22–05:37 — Statement: <i>“an entirely new Cutting Edge approach by data scientists led by um a data scientist expert in the UK but mainly Israelis from Israeli universities”</i>

- (a) Funding:** Not disclosed. Presumably funded through the same channels as the Asserson report.
- (b) Conflict of interest:** Israeli university researchers examining coverage of an Israeli military operation have a potential national/institutional interest in the outcome. This is not acknowledged.
- (c) Missing counter-source:** No independent data scientist or content analyst is cited to assess the methodology.

Credibility Matrix — Asserson Report as Source:

Dimension	Score	Justification
D1 Conflict of Interest	-2	Self-commissioned; advocacy background; undisclosed funding
D2 Personal Risk	-1	Reputational risk if discredited, but significant advocacy gain

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

D3 Subject Competence	-1	Legal methodology applied to media content analysis
D4 Opinion Consistency	+1	Consistent with prior advocacy positions
D5 Emotionalisation vs. Data	-1	Data claims mixed with evaluative superlatives
D6 Source Level	-2	Not peer-reviewed; self-produced; not independently replicated
TOTAL	-6	SOURCE TRAFFIC LIGHT: ● RED

Summary: The segment relies on a single non-peer-reviewed, advocacy-commissioned report as its sole source, presented without any independent verification, counter-source, or methodological scrutiny. This represents a fundamental failure of source diversity on a highly contested topic.

3. TIME DISTRIBUTION							7/10		
1	2	3	4	5	6	7	8	9	10

Estimated speaking time:

- Trevor Asserson (pro-report, pro-Israel advocacy position): approximately 6 min 30 sec (approx. 81%)
- Presenter (co-advocacy, no opposing position represented): approximately 1 min 30 sec (approx. 19%)
- BBC / opposing perspective: 0 minutes (0%)
- Any alternative expert: 0 minutes (0%)

Summary: The segment allocates 100% of substantive speaking time to a single position. The BBC, which is the subject of serious accusations, receives zero speaking time. No alternative expert, critic of the report, or representative of any opposing view is given any time. This is a structural violation of balance requirements on a highly contested topic.

4. OMISSION (Selective Omission)

9/10

1

2

3

4

5

6

7

8

9

10

Omission 1:

Context

The BBC's detailed methodological rebuttal of the Asserson report is entirely absent.

Relevant at: 05:09–05:46 — Asserson states the BBC "criticized the report for its methodology without before they'd read it."

Effect

The BBC's objections are characterised as premature and therefore invalid, without any presentation of what those objections actually were. Viewers cannot assess whether the methodological critique has merit.

Omission 2:

Context

The existence of substantial criticism arguing BBC coverage was biased *against* Palestinians is entirely omitted.

Relevant at: Throughout — the segment treats pro-Israel bias criticism as the only relevant critique of BBC coverage.

Effect

Viewers are given no indication that the BBC faces simultaneous accusations of bias from the opposite direction, which would be essential context for assessing the report's claims.

Omission 3:

Context

Israeli military restrictions on press access to Gaza, and the conditions under which all journalists — not only those working under Hamas — operate in the conflict zone, are entirely omitted.

Relevant at: 03:52–04:18 — Asserson discusses Hamas information control without any reference to Israeli restrictions.

Effect

The segment creates a false impression that reporting constraints in Gaza are exclusively a Hamas-imposed phenomenon, when documented Israeli restrictions on foreign press access are equally relevant to understanding the information environment.

Summary: The omissions are systematic and directional — every absent element would complicate or undermine the segment's central thesis. The cumulative effect is to present a one-sided advocacy position as comprehensive analysis.

Missing Voices

- BBC spokesperson/editorial director: Would have provided the institution's detailed methodological rebuttal and editorial policy context.
- Independent quantitative methodologist (university-based): Would have assessed whether Asserson's counting methodology constitutes valid content analysis.
- Palestinian journalist or Gaza-based correspondent: Would have described the actual conditions of reporting under both Hamas and Israeli restrictions.

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

- Ofcom senior official: Would have clarified the legal standard of "due impartiality" and whether the BBC's coverage meets or breaches it under existing regulatory frameworks.
- Media studies academic specialising in conflict journalism: Would have contextualised the findings within the broader literature on war reporting and source dependency.
- Former BBC Middle East correspondent: Would have provided insider perspective on editorial pressures and management structures.
- Representative of a press freedom NGO (e.g., RSF, CPJ): Would have addressed the structural constraints on all journalists reporting from Gaza.
- Critic arguing BBC coverage was biased against Palestinians: Would have represented the substantial counter-narrative that the BBC over-represented Israeli government framing.

5. NUMERICAL MANIPULATION								7/10	
1	2	3	4	5	6	7	8	9	10

Complete figures include: absolute value, proportion (%) and trend

Finding 1:	
Timestamp	00:07–00:12
Number: "more than 1500 times" (editorial guideline breaches)	
Missing context	No information is provided about the total volume of BBC output examined, the definition of "breach" used, whether the methodology was peer-reviewed, or what the baseline rate of editorial errors in comparable broadcasters might be. Asserson later mentions "9 million words" were examined, but the ratio (1,500 breaches per 9 million words) is not contextualised.
Effect	The raw number "1,500" sounds large and damning without any comparative framework. If 9 million words were examined, 1,500 instances represents approximately 0.017% of output — a figure that could be interpreted very differently depending on the definition of "breach."

Finding 2:	
Timestamp	00:14–00:17
Number: "Israel was associated with genocide 14 times more than Hamas"	
Missing context	The absolute numbers underlying this ratio are not provided. "14 times more" could mean 14 instances vs. 1, or 140 vs. 10. The relevance of the comparison is also not examined: the ICJ was actively considering genocide allegations against Israel during this period, which would make such associations newsworthy rather than necessarily biased.
Effect	The ratio creates an impression of extreme disproportionality without the denominators that would allow viewers to assess its significance.

Finding 3:	
Timestamp	05:05–05:08
Number: "we looked at 9 million words"	
Missing context	The 9 million word figure is presented as a quality indicator ("most in-depth analysis") without any information about how the words were coded, what inter-rater reliability was achieved, or whether the coding scheme was validated.
Effect	The large number functions rhetorically to imply scientific rigour without providing the methodological transparency that would allow independent assessment.

Summary: Statistical claims are presented without denominators, comparative baselines, or methodological transparency. The numbers function rhetorically to create an impression of scientific certainty that the underlying methodology does not support.

6. GUILT BY ASSOCIATION						6/10			
1	2	3	4	5	6	7	8	9	10

Association 1:	
Timestamp	00:29–00:39
Quote	<i>**11 instances in which their coverage featured reporters who publicly supported Hamas**</i>
Technique: BBC Arabic journalists are associated with Hamas support through the claim that they "publicly supported" Hamas. The nature, context, and verification of these "public" statements is not examined. The association implies that BBC Arabic's coverage is produced by Hamas sympathisers.	
Effect	Viewers associate BBC Arabic journalists with a designated terrorist organisation, discrediting the entire output of the channel without examining individual cases.

Association 2:	
Timestamp	02:10–02:29
Quote	<i>**are taxpayer funded broadcasters more likely to indulge in this sort of unrelentingly biased coverage against Israel**</i>
Technique: The presenter associates all public broadcasters (BBC, ABC) with a single characterisation of bias, extending the specific claims about BBC Arabic to the entire category of publicly funded media.	
Effect	The association implies that public funding itself produces anti-Israel bias, discrediting the institutional model rather than specific editorial decisions.

Source Check for persons framed as biased/problematic:

The BBC journalists described as having "publicly supported Hamas":

- Are their primary sources examined? NO — no specific cases are cited with evidence.
- Are the core claims falsifiable? PARTIALLY — "publicly supported" is a falsifiable claim in principle, but no evidence is presented in the segment.
- Risk matrix: These journalists face significant professional and reputational risk from such characterisations. What they gain is not examined.
- Tonality: The characterisation is presented as factual without documentation.
- Result Category: B (borderline) — The claim may be accurate in some cases but is presented without the evidentiary standard required to justify the association.

Association Chain: BBC Arabic journalists → Hamas supporters → BBC institutional bias → all public broadcasters → ABC

Summary: The segment constructs an association chain from individual journalists to institutional bias to a general indictment of public broadcasting, without providing verifiable evidence for each link in the chain.

7. TIMING

7/10

1

2

3

4

5

6

7

8

9

10

Finding 1:

Position: 00:00–00:39 (Opening)

Content: "more than 1500 times... Israel was associated with genocide 14 times more than Hamas... BBC's Arabic channel was found to be one of the most biased of all Global media Outlets"

Timing Effect: The most dramatic and damaging claims are front-loaded before any context, qualification, or alternative perspective is introduced. This exploits the primacy effect — viewers form their initial impression from the opening statements, which are presented as established facts. Any subsequent nuance (which in this case never arrives) would struggle to displace this initial framing.

Finding 2:

Position: 07:31–07:45 (Late segment)

Content: "I have a fear that this matter may have to appear before an English judge and and an English judge will they understand what impartiality means even if the BBC don't uh and I think that they will find the BBC is in absolutely hopeless breach"

Timing Effect: The threat of legal action is placed near the end of the segment, functioning as a closing escalation. After 7 minutes of unchallenged criticism, the suggestion of judicial proceedings reinforces the impression that the BBC's position is legally indefensible. This is placed too late for any rebuttal.

Finding 3:

Position: 07:48–08:03 (Closing)

Content: "it's not just the BBC I would argue our own ABC breaches its Charter daily it would be wonderful if you could uh run a review of their work"

Timing Effect: The presenter's closing editorial statement — explicitly endorsing the guest's methodology and inviting its application to the ABC — functions as a call to action. Placed at the very end, it is the last thing viewers hear and serves as the segment's implicit conclusion: public broadcasters are systematically biased and should be investigated.

Summary: The segment's information architecture is designed for maximum persuasive impact: damaging claims front-loaded, legal threat mid-to-late, and a presenter call-to-action at the close. No corrective information appears at any point.

8. SELECTIVE OUTRAGE

8/10

1

2

3

4

5

6

7

8

9

10

Outrage = bias. Selective outrage amplifies the finding. Score = outrage level (0–5) + selectivity (0–5)

Methodological Principle (v2.2): Before each assessment, the trigger event must be documented. A reaction can only be assessed as selective if comparable triggers in other positions produced no analogous reaction.

Finding 1:

Timestamp 00:14–00:23

Trigger event: Asserson's claim that BBC associated Israel with genocide more than Hamas.

Reaction: "Israel was associated with genocide 14 times more than Hamas who carried out the mass terrorist attacks against Israelis on October 7" — The presenter presents this as self-evidently outrageous.

Comparison

No comparable outrage is expressed at the documented deaths of over 30,000 Palestinians in Gaza during the same period, at Israeli restrictions on press access, or at any other aspect of the conflict that might generate outrage from a different perspective.

Asymmetry: Outrage is expressed exclusively at perceived under-criticism of Hamas and over-criticism of Israel. No outrage is expressed at any aspect of Israeli conduct or at the conditions of Palestinian civilians. This is directional and therefore selective.

Finding 2:

Timestamp 03:27–03:44

Trigger event: Asserson's description of journalists with "very very negative views" about Israel.

Reaction: "they should be sent to something more harmless like Garder question time where they can do less harm" — The presenter does not challenge the suggestion that journalists should be reassigned based on their views.

Comparison

No comparable concern is expressed about journalists with strongly pro-Israel views reporting on the conflict, or about the potential bias introduced by Israeli university researchers conducting the data analysis.

Asymmetry: The concern about journalistic bias is applied exclusively to journalists perceived as critical of Israel. The structural bias of the report's own researchers is not subject to any analogous concern.

Finding 3:

Timestamp 07:48–07:54

Trigger event: End of interview.

Reaction: "it's not just the BBC I would argue our own ABC breaches its Charter daily"

Comparison

No comparable outrage is expressed at any pro-Israel media outlet, at any broadcaster that may have under-reported Palestinian casualties, or at any media organisation that amplified Israeli government statements without scrutiny.

Asymmetry: The presenter's outrage is exclusively directed at public broadcasters perceived as insufficiently supportive of Israel. This is a consistent directional pattern throughout the segment.

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

Summary: Outrage in this segment is structurally one-directional — it is expressed exclusively at perceived anti-Israel bias and never at any comparable phenomenon on the other side of the conflict. This represents selective outrage as defined by the criterion.

9. COMPLETENESS									9/10
1	2	3	4	5	6	7	8	9	10

Share of covered perspectives

Inverted: original value measures coverage (higher = better). Shown as deviation (higher = larger gaps).

Independent of the transcript, the following perspectives would be required for genuinely balanced coverage of this topic:

- [A]** The BBC's own detailed response to the Asserson report, including its specific methodological objections.
- [B]** Independent academic media scholars with no financial stake in the outcome, assessing the report's methodology.
- [C]** Palestinian journalists and media organisations describing the conditions under which they report from Gaza, including Israeli restrictions on foreign press access.
- [D]** Israeli government and military communications strategy, including documented cases of information management and restrictions on journalists.
- [E]** Pro-Palestinian media critics who argue BBC coverage has been systematically biased *against* Palestinians, citing different evidence sets.
- [F]** Ofcom or independent regulatory bodies on the legal and editorial standards applicable to BBC impartiality obligations.
- [G]** Former BBC journalists or editors who could speak to internal editorial processes and management structures.
- [H]** Data scientists or statisticians independent of the Asserson report who could assess the validity of the quantitative methodology.
- [I]** Representatives of press freedom organisations (e.g., Reporters Without Borders, Committee to Protect Journalists) on the conditions of reporting from conflict zones.
- [J]** Comparative media scholars who could contextualise BBC coverage against other international broadcasters covering the same conflict.

Soft Facts — 6 qualitative techniques

10. FRAMING

9/10

1

2

3

4

5

6

7

8

9

10

Finding 1:

Timestamp	00:00–00:31
Quote	<i>**research led by British lawyer Trevor Asserson which found that the BBC breached its own editorial guidelines for news coverage more than 1500 times during the height of the Israel Hamas War**</i>
Manipulation	The presenter opens by presenting the Asserson report's conclusions as established fact ("found that"), not as contested claims. The word "found" implies verified discovery rather than advocacy-commissioned analysis.
Why problematic	Viewers are primed to accept the report's conclusions as empirically settled before any scrutiny is applied. The framing forecloses the possibility that the methodology is disputed or that alternative analyses exist.

Finding 2:

Timestamp	00:14–00:23
Quote	<i>**Israel was associated with genocide 14 times more than Hamas who carried out the mass terrorist attacks against Israelis on October 7**</i>
Manipulation	The framing embeds a normative hierarchy: Hamas's actions are characterised as definitively "mass terrorist attacks" (accurate under most legal definitions), while the genocide association with Israel is presented as inherently illegitimate bias. The framing does not acknowledge that the International Court of Justice was simultaneously examining genocide allegations against Israel.
Why problematic	The framing presents a contested legal and political question (whether Israeli military operations constitute genocide) as self-evidently false, thereby pre-judging the substantive debate the BBC was covering.

Finding 3:

Timestamp	06:05–06:19
Quote	<i>**the net result is unremitting bias**</i>
Manipulation	The term "unremitting" — meaning without pause or relief — is presented as a factual conclusion of the report rather than an advocacy characterisation. The presenter does not challenge this absolute formulation.
Why problematic	"Unremitting" is an evaluative superlative that forecloses nuance. A balanced programme would interrogate whether any BBC coverage was found to be fair, and why that is not acknowledged.

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

Summary: The entire segment is framed as a prosecution of the BBC with the verdict already delivered. The presenter's language consistently treats contested advocacy findings as established fact, and the framing systematically excludes the possibility of legitimate disagreement with the report's conclusions.

11. WORD CHOICE AND TERMINOLOGY								8/10	
1	2	3	4	5	6	7	8	9	10

Finding 1:	
Timestamp	00:22–00:29
Quote	<i>“the BBC's Arabic channel was found to be one of the most biased of all Global media Outlets against Israel”</i>
Manipulation	"Most biased of all Global media Outlets" is a superlative comparative claim presented without any reference to the comparative study that would be required to substantiate it. The phrase "against Israel" frames bias as directional and intentional.
Why problematic	Neutral alternative would be: "The report rated BBC Arabic's coverage as significantly more critical of Israel than other outlets examined." The current phrasing implies a deliberate anti-Israel agenda across global media.

Finding 2:	
Timestamp	03:27–03:29
Quote	<i>“they should be sent to something more harmless like Garder question time where they can do less harm”</i>
Manipulation	The phrase "do less harm" characterises journalism critical of Israel as inherently harmful. "Harmless" implies that the journalists' views are dangerous and should be suppressed rather than editorially managed.
Why problematic	This language frames journalistic opinion as a threat requiring containment, which is incompatible with press freedom principles. The presenter does not challenge this characterisation.

Finding 3:	
Timestamp	06:05–07:45
Quote	<i>“totally destroyed what trust there may have still have been”</i> and <i>“absolutely hopeless breach time and time again”</i>
Manipulation	Superlative language ("totally destroyed," "absolutely hopeless") is used throughout without qualification. These are advocacy formulations, not analytical conclusions.
Why problematic	The accumulation of absolute language ("totally," "absolutely," "unremitting," "time and time again") creates an emotional register of certainty that substitutes for evidential rigour. A neutral alternative would use qualified language: "significantly undermined," "substantial evidence of breach."

Summary: The word choices throughout the segment are drawn from advocacy rather than analytical discourse, with superlatives and absolute formulations used to foreclose nuance. The presenter adopts and amplifies this language rather than applying neutral journalistic terminology.

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

12. MODERATION BEHAVIOUR

8/10

1 2 3 4 5 6 7 8 9 10

Methodological Principle (v2.2): Before each assessment, the trigger event must be documented. An intervention can only be assessed as asymmetric if comparable triggers in other guests produced no analogous intervention.

Finding 1:

Timestamp 01:57–02:29

Trigger event: Asserson has just described BBC editorial guideline breaches. The presenter does not challenge any specific claim but instead pivots to extend the critique to the Australian ABC.

Quote (Presenter) *"our own publicly funded broadcaster the ABC here in Australia has a similar world view to the BBC in your experience are taxpayer funded broadcasters more likely to indulge in this sort of unrelentingly biased coverage against Israel"**

Comparison There is no second guest in this segment. However, the presenter's own framing — "unrelentingly biased coverage against Israel" — adopts Asserson's characterisation as her own, rather than presenting it as his claim. This is a presenter editorialising rather than questioning.

Asymmetry: The presenter functions as a co-advocate rather than an interviewer. No challenge is issued at any point in the 8-minute segment.

Finding 2:

Timestamp 04:22–04:54

Trigger event: Asserson has made the claim that his report "may be the most in-depth analysis of any of the BBC's output that's ever been done."

Quote (Presenter) *"your report uh does illustrate that the lines between opinion and impartial unbiased news reporting have been completely blurred"**

Comparison No comparable trigger from a guest with an opposing view exists in this segment.

Asymmetry: The presenter accepts Asserson's self-assessment of his report's significance without challenge and then presents his report's conclusions ("does illustrate") as established fact. A neutral moderator would use "claims to illustrate" or "argues that."

Finding 3:

Timestamp 07:48–08:03

Trigger event: End of interview.

Quote (Presenter) *"it's not just the BBC I would argue our own ABC breaches its Charter daily it would be wonderful if you could uh run a review of their work"**

Comparison No comparable trigger from an opposing guest exists.

Asymmetry: The presenter abandons any pretence of journalistic neutrality, explicitly endorsing the guest's methodology and inviting him to apply it to the Australian ABC. This is an editorial position, not journalism.

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

Summary: The presenter functions throughout as a co-advocate for the Asserson report's conclusions, never issuing a single challenge, counter-question, or request for evidence. The moderation behaviour is entirely asymmetric because there is no opposing guest and no moderating function is performed.

13. QUESTION ASYMMETRY

8/10

1

2

3

4

5

6

7

8

9

10

Asymmetry 1:

To Asserson, 00:47–00:50: "Trevor is the BBC institutionally anti-semitic" — Framing: This is a leading question that invites the most damaging possible characterisation of the BBC. Even though Asserson declines to use the term "anti-Semitism," the question plants the concept in the viewer's mind.

To BBC (absent): No question is directed to the BBC at any point.

Comparison

The BBC is accused of over 1,500 editorial breaches and potential institutional anti-Semitism without being given any opportunity to respond. The asymmetry is absolute.

Asymmetry 2:

To Asserson, 06:43–06:52: "beyond that have they had a response to your damning findings are they at least uh attempting to do better in the future"

Framing: The question accepts "damning findings" as a given and frames the BBC's only possible response as remediation. The word "damning" is the presenter's own characterisation, not a neutral descriptor.

To BBC (absent): No question about whether the findings are actually valid, whether the methodology is sound, or whether the BBC's coverage was in fact balanced in ways the report did not capture.

Comparison

The asymmetry is structural — one party is questioned with leading, sympathetic prompts; the other party is not present and is characterised negatively by the presenter herself.

Summary: The question structure is entirely one-directional. Every question to Asserson is either leading (inviting stronger condemnation of the BBC) or prompting (inviting elaboration of his conclusions). No challenging question is asked at any point in the segment.

14. FALSE BALANCE									3/10
1	2	3	4	5	6	7	8	9	10

Finding 1:

Timestamp 01:06–01:19

Construct: "I've not suggested that there's anti-Semitism um I've deliberately avoided doing that"

Analysis Asserson's disclaimer that he is not alleging anti-Semitism, after the presenter has explicitly asked whether the BBC is "institutionally anti-semitic," creates a superficial appearance of moderation. However, the disclaimer does not constitute genuine balance — it is a rhetorical device that allows the concept to be introduced (by the presenter's question) while Asserson maintains deniability. This is not false balance in the classical sense (presenting two equal sides) but rather a false moderation within a one-sided segment.

Note: False balance in the classical sense (presenting two equally weighted but unequal positions) is largely absent from this segment because the segment makes no attempt at balance whatsoever. The score is therefore relatively low on this criterion — the segment does not pretend to be balanced.

Summary: The segment does not employ false balance in the classical sense because it makes no attempt to present opposing views. The only instance of superficial moderation is Asserson's disclaimer about anti-Semitism, which functions rhetorically rather than substantively.

15. AGENDA-SETTING

9/10

1

2

3

4

5

6

7

8

9

10

Finding 1:

Agenda element set: That BBC coverage of the Israel-Hamas conflict was systematically biased against Israel is treated as an established fact requiring no further verification.

Timestamp

00:00–00:39 — Evidence: *"research led by British lawyer Trevor Asserson which found that the BBC breached its own editorial guidelines"* — "found" treats the conclusion as settled.

Alternative agenda: Whether the BBC's coverage was actually balanced, whether it accurately reflected the scale of Palestinian casualties, whether it gave sufficient weight to international humanitarian law — none of these questions reach the agenda.

Finding 2:

Agenda element set: That public broadcasters are structurally prone to anti-Israel bias is treated as a general principle.

Timestamp

02:30–03:12 — Evidence: *"public sector broadcasters are as likely as any other uh news outlets to be captured by a particular Viewpoint"* — presented as analytical insight rather than advocacy claim.

Alternative agenda: Whether commercial broadcasters (including the one airing this segment) are equally prone to capture by particular viewpoints — specifically pro-Israel viewpoints — is entirely absent from the agenda.

Finding 3:

Agenda element set: That the appropriate response to perceived bias is management control over journalists' views.

Timestamp

03:25–03:44 — Evidence: *"they should be sent to something more harmless like Garder question time where they can do less harm"*

Alternative agenda: Whether editorial independence from management is itself a press freedom value; whether the solution to perceived bias is greater editorial oversight or greater transparency — these questions do not reach the agenda.

Summary: The segment's agenda is set entirely by the Asserson report's framework. Questions that would complicate or challenge that framework — about Palestinian casualties, Israeli press restrictions, the validity of the methodology, or the bias of the segment's own broadcaster — are entirely absent from the agenda.

CHAPTER 2 — OVERALL EVALUATION

Results

Note: The combined score of 5.55 reflects the extremely low completeness score dragging down an otherwise high manipulation score. The raw manipulation score of 7.5 is the more relevant indicator for editorial conduct assessment.

Dominant Techniques

The 3 strongest techniques in this segment:

- 1. Framing (Score 9):** The segment frames a contested advocacy report as established fact from the opening sentence, using the word "found" to present conclusions as verified discoveries. This primacy framing is never corrected or qualified throughout the 8-minute segment, making it the foundational manipulation technique upon which all others depend.
- 2. Expert Selection / Source Selection (Scores 9/9):** The exclusive reliance on a single RED-rated source — a litigation lawyer presenting his own self-commissioned, non-peer-reviewed report — without any independent expert, counter-source, or BBC representative constitutes a structural failure of source diversity. The source's advocacy background and potential conflicts of interest are not disclosed to viewers.
- 3. Omission (Score 9):** The systematic exclusion of every perspective that would complicate the segment's thesis — including the BBC's actual methodological rebuttal, Palestinian journalists' perspectives, Israeli press restrictions, and counter-analyses of BBC coverage — means viewers receive a comprehensively one-sided account of a highly contested topic.

Core Messages of the Segment

MESSAGE 1 (SUBSTANTIVE): "The BBC has been proven to be systematically and unremittingly biased against Israel in its coverage of the Gaza conflict."

Technique: Framing + Source Selection — Evidence presented as established fact from a single advocacy source.
Timestamps: 00:00–00:39, 06:05–06:19.

MESSAGE 2 (PERSONAL): "Trevor Asserson is a credible, rigorous analyst whose methodology is sound and whose conclusions should be trusted."

Technique: Expert framing without disclosure of conflicts of interest. Timestamps: 00:40–00:50, 05:00–05:46.

MESSAGE 3 (SOCIAL): "Publicly funded broadcasters — including the BBC and the Australian ABC — are structurally prone to anti-Israel bias and require external oversight and management control."

Technique: Agenda-Setting + Selective Outrage + Presenter editorialising. Timestamps: 02:10–02:29, 07:48–08:03.

Manipulation Level Classification

Justification: The segment scores 7.5/10 on the manipulation scale, placing it firmly in the "systematic bias" category. The bias is not incidental or the result of editorial oversight but is structural: the programme format (single unchallenged guest), the presenter's explicit co-advocacy, the complete absence of any opposing perspective, and the systematic omission of all contextual information that would complicate the segment's thesis collectively constitute a pattern of systematic one-sidedness. Under BBC Charter Article 6, which requires "due impartiality" in news and current affairs programming, this segment would represent a significant breach — though it should be noted that this appears to be an Australian commercial broadcaster, not the BBC itself, and is therefore subject to Australian rather than BBC regulatory standards. The irony of a segment alleging BBC bias itself exhibiting systematic bias of comparable or greater magnitude is analytically significant.

CONCLUSION

This segment constitutes a textbook example of advocacy journalism presented in the format of news analysis. A single interested party — a litigation lawyer presenting his own self-commissioned, non-peer-reviewed report — is

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

given eight uninterrupted minutes to make the most damaging possible case against the BBC's coverage of the Israel-Hamas conflict, with a presenter who functions as a co-advocate rather than a journalist. Under BBC Charter Article 6's requirement for "due impartiality," a segment of this structure on a topic of this controversy would represent a clear breach: no opposing expert is consulted, the BBC is given no opportunity to respond, the report's methodology is not independently assessed, and the presenter explicitly endorses the guest's conclusions and invites him to apply his methodology to another public broadcaster. The segment's completeness score of 1/10 reflects the near-total absence of the perspectives that would be required for genuinely balanced coverage of this topic. The analytical irony — that a segment alleging systematic BBC bias itself exhibits systematic bias of comparable magnitude — does not diminish the seriousness of the editorial failures identified; it amplifies them.

CHAPTER 3 — PARTY-POLITICAL BIAS

Note: This segment does not address UK domestic party politics directly. The subject matter is BBC editorial conduct regarding the Israel-Hamas conflict. Party positions are therefore largely not directly represented. Scores reflect the degree to which party-relevant positions on media regulation, public broadcasting, and foreign policy are accurately or inaccurately represented.

Party	Score (-5..+5)	Programme Representation vs. Party Programme Position
Conservative	0	Not directly referenced. Conservative policy on BBC regulation (sceptical of BBC, supportive of charter reform) is implicitly aligned with the segment's framing, but no explicit Conservative position is cited or misrepresented.
Labour	-2	Not directly referenced. Labour's position on the BBC (broadly supportive of public broadcasting, critical of charter reform pressure) is implicitly contradicted by the segment's framing of public broadcasters as structurally biased, but no Labour position is explicitly cited.
Lib Dems	0	Not referenced. No Lib Dem position on BBC regulation or Israel-Hamas coverage is cited or misrepresented.
SNP	0	Not referenced. No SNP position is cited or misrepresented.
Reform UK	+1	Not directly referenced. Reform UK's position (hostile to BBC, supportive of defunding or restructuring public broadcasting) is implicitly supported by the segment's framing of public broadcasters as captured by ideological bias, though no Reform position is explicitly cited.
Green	-1	Not referenced. Green Party positions on Palestinian rights and media coverage of Gaza are implicitly contradicted by the segment's framing, but no Green position is explicitly cited or misrepresented.

Party Bias Summary

- Most accurate representation: Conservative (Score 0) — not directly addressed, no misrepresentation.
- Strongest distortion: Labour (Score -2) — the segment's implicit framing of public broadcasting as structurally biased contradicts Labour's policy position without acknowledgement.
- Average deviation from 0: 0.67
- Conclusion: The segment does not engage directly with UK party politics. However, its implicit framing — that public broadcasters are structurally prone to ideological capture and require external management oversight — aligns with the positions of right-leaning parties (Conservative, Reform UK) and contradicts the positions of left-leaning parties (Labour, Green) on media regulation and public broadcasting. This alignment is not coincidental: the segment is broadcast on what appears to be a right-leaning commercial broadcaster with a documented editorial stance hostile to public broadcasting institutions.

CHAPTER 4 — LEGAL CLASSIFICATION (BBC Charter Art. 6)

Assessment under BBC Charter Art. 6

Preliminary note: This segment does not appear to be BBC output. It appears to be broadcast by an Australian commercial broadcaster (likely Sky News Australia). BBC Charter Article 6 therefore does not directly apply to this segment as a regulatory matter. However, the analysis is conducted as requested, treating the segment as if it were subject to BBC Charter standards, and noting the analytical irony that a segment alleging BBC Charter breaches would itself breach those standards if it were BBC output.

Breach 1:

Standard: BBC Charter Art. 6 / BBC Editorial Guidelines Section 4 (Impartiality)

Offence: The segment presents a single advocacy position on a highly contested topic (BBC coverage of the Israel-Hamas conflict) without any opposing perspective, counter-expert, or BBC response.

Evidence: Timestamp 00:00–08:05 — the entire segment. Quote: "research led by British lawyer Trevor Asserson which found that the BBC breached its own editorial guidelines for news coverage more than 1500 times" — presented as established fact without challenge.

Assessment: BBC Editorial Guidelines require that "we must ensure we avoid bias or an imbalance of views on controversial subjects." A segment that allocates 100% of substantive speaking time to a single position on a highly controversial topic, without any opposing voice, represents a clear breach of this standard.

Breach 2:

Standard: BBC Charter Art. 6 / BBC Editorial Guidelines Section 3 (Accuracy)

Offence: Statistical claims from the Asserson report are presented as accurate without independent verification, without disclosure of the report's funding sources, and without noting the BBC's methodological objections.

Evidence: Timestamp 00:07–00:17 — Quote: "more than 1500 times... Israel was associated with genocide 14 times more than Hamas" — presented without qualification.

Assessment: BBC Editorial Guidelines require that "we should be honest and open about what we don't know and avoid pretending to more certainty than we have." Presenting contested, non-peer-reviewed statistics as established facts without qualification breaches this standard.

Breach 3:

Standard: BBC Charter Art. 6 / BBC Editorial Guidelines Section 4 (Presenter impartiality)

Offence: The presenter explicitly endorses the guest's conclusions, adopts his characterisations as her own ("unrelentingly biased coverage"), and invites him to apply his methodology to another broadcaster.

Evidence: Timestamp 07:48–08:03 — Quote: "it's not just the BBC I would argue our own ABC breaches its Charter daily it would be wonderful if you could uh run a review of their work"

Assessment: BBC Editorial Guidelines prohibit presenters from expressing personal opinions on controversial topics. The presenter's closing statement is an explicit editorial position on a highly contested matter, representing a clear breach of presenter impartiality standards.

Overall Assessment under BBC Charter Art. 6

If this segment were BBC output, it would represent multiple simultaneous breaches of BBC Charter Article 6 and the associated Editorial Guidelines: a failure of impartiality through exclusive reliance on a single advocacy position; a failure of accuracy through uncritical presentation of contested statistics; and a failure of presenter impartiality through explicit editorial endorsement of the guest's conclusions. The segment's subject matter — allegations of BBC bias — makes these failures particularly significant, as the programme is in effect making serious accusations against a public institution while itself failing to meet the editorial standards it claims to be defending. The analytical irony is that a

rigorous application of the Asserson report's own stated methodology — counting breaches of editorial guidelines — to this segment would likely identify multiple such breaches within its eight-minute runtime.

SOURCE DEPTH CHECK (Mandatory for all cited expert bodies / NGOs / advisory bodies)

Source 1: The Asserson Report (Asserson Law Offices)

- 1. FUNDING:** Not fully disclosed publicly. Produced by Asserson Law Offices, a commercial litigation firm with a documented history of pro-Israel legal advocacy. The data science component was conducted by researchers described as "mainly Israelis from Israeli universities" — funding for this component is not disclosed in the segment.
- 2. MANDATE:** The mandate of a litigation law firm is to construct the strongest possible case for a client position. This is structurally incompatible with neutral content analysis. Asserson himself describes his methodology as "normal standard litigation type analysis" — confirming that the report is designed to find and catalogue breaches, not to assess overall balance.
- 3. CONFLICT OF INTEREST:** Asserson Law Offices has a direct institutional interest in the report's conclusions: the report establishes the firm's profile as a pro-Israel legal advocacy resource, generates media attention, and potentially creates future legal business (Asserson himself raises the prospect of English court proceedings). The Israeli university researchers have a potential national interest in findings that support the Israeli government's position on media coverage of its military operations.
- 4. CREDIBILITY MATRIX (Source Traffic Light, 6D -2/+2):**

Dimension	Score	Justification
D1 Conflict of Interest	-2	Self-commissioned; advocacy background; undisclosed funding; potential future legal business
D2 Personal Risk	-1	Reputational risk if methodology is discredited; but significant advocacy and commercial gain from publicity
D3 Subject Competence	-1	Litigation methodology applied to media content analysis; not peer-reviewed by media scholars
D4 Opinion Consistency	+1	Consistent with prior pro-Israel advocacy positions
D5 Emotionalisation vs. Data	-1	Data claims mixed with evaluative superlatives; "unremitting," "totally destroyed," "absolutely hopeless"
D6 Source Level	-2	Self-produced; not peer-reviewed; not independently replicated; methodology not validated by independent scholars
TOTAL	-6	SOURCE TRAFFIC LIGHT: ● RED

- 5. COUNTER-SOURCE:** Multiple counter-sources exist and are entirely absent from the segment:
 - Cardiff University's School of Journalism has conducted peer-reviewed content analyses of BBC coverage that would provide an independent methodological baseline.
 - The BBC's own written response to the Asserson report contains specific methodological objections that are not presented.
 - Ofcom's published assessments of BBC impartiality provide a regulatory framework against which the report's claims could be assessed.
 - Academic literature on content analysis methodology would allow assessment of whether Asserson's "litigation type analysis" meets social-scientific standards.

IMPORTANT NOTE: The fact that the Asserson report has received significant media attention and has been described as "in-depth" by its author is not a qualification. It is a social attribution that must itself be scrutinised. The report has not been peer-reviewed, its funding has not been fully disclosed, and its methodology has been disputed by the institution it analyses. "Recognised" and "in-depth" are social characterisations, not evidential qualifications.

Serious deviation from the impartiality standard. High degree of deviation

SOFT FACTS SCORE (9-14)

7.5/10

Serious deviation from the impartiality standard. High degree of deviation

OVERALL SCORE

7.7/10

Serious deviation from the impartiality standard. High degree of deviation

Average of Hardfacts and Softfacts

KEY — Score Definitions

Individual Scores per Criterion (0–10)

0	No finding	No relevant anomaly detected.
1–2	Weak finding	Minor anomaly without substantial impact on balance.
3–4	Slight to moderate finding	Recognizable tendency; low to moderate impact relevance.
5	Moderate finding with impact	Relevant imbalance affecting the audience's opinion-forming potential.
6	Significant finding (threshold)	Scores of 6 and above are classified as 'significant findings.'
7	Significant finding	Clear, well-documented imbalance with distinct impact relevance.
8–9	Severe finding	Pronounced imbalance; multiple documented individual findings in this criterion.
10	Maximum severity	Systematic, pervasive imbalance in this criterion.

Aggregated Deviation Index — Interpretation Ranges

0.0 – 2.5	Unremarkable	No significant patterns detected; broadcast meets the impartiality standard.
2.6 – 4.0	Slight imbalance	Isolated anomalies; statistically visible but within tolerance range.
4.1 – 6.0	Significant imbalance	Multiple significant findings; relevant impairment of perspective diversity.
6.1 – 8.0	Serious deviation from the impartiality standard. High degree of deviation	Pronounced, cross-broadcast patterns; high impact relevance.
8.1 – 10	Fundamental systemic one-sidedness. Very high bias degree	Maximum severity across nearly all criteria; systematically one-sided reporting.

Party-Political Bias (-5 to +5)

-5 to -3	Strongly disadvantaged	Party is significantly underrepresented in framing, airtime, or presentation.
-2 to -1	Slightly disadvantaged	Recognizable but minor disadvantage.
0	Neutral	No detectable favoritism or disadvantage.
+1 to +2	Slightly favored	Recognizable but minor favoritism.
+3 to +5	Strongly favored	Party is significantly overrepresented in framing, airtime, or presentation.

Legal and Methodological Notes

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

No factual determination

The results presented do not constitute factual determinations about individual persons, editorial teams, or broadcasts. They are the product of a standardized operationalization, not a finding of individual responsibility.

No legal judgment

The aggregated deviation index does not replace a legal assessment under Ofcom Broadcasting Code. The determination of whether a specific broadcast violates legal requirements is exclusively the responsibility of the competent authorities (in particular Ofcom).

No proof of causation

Statistical correlations are not to be interpreted as proof of causal relationships or editorial intent. Deviation values may be influenced by topic selection, news environment, political controversy, or format logic.

No judgment of intent

The analysis measures observable structural characteristics of broadcasts. A score of 7 means a significant imbalance was detected — not that the editorial team intended it. The methodology makes no claims about motives or strategic objectives.

Heuristic comparison tool

The index serves comparative pattern recognition across thousands of broadcasts, not precise metric measurement of individual segments. Threshold values serve heuristic orientation, not sharp legal qualification.

APPENDIX: NATIONAL BROADCASTING LAW

Legal Framework United Kingdom — BBC

Legislation

- BBC Royal Charter (2017, valid until 2027)
- Communications Act 2003
- Ofcom Broadcasting Code

Relevant Provisions

BBC Royal Charter

- Art. 5 (Public Purposes): Sustaining citizenship and civil society through the provision of impartial news and information to help people understand and engage with the world around them.
- Art. 6(4): The BBC must observe high standards of due impartiality.

Communications Act 2003

- s.319(2)(c): News included in television and radio services is presented with due impartiality.
- s.320(1): Special impartiality requirements for matters of political controversy and matters relating to current public policy.

Ofcom Broadcasting Code

- Section 5 (Due Impartiality): Due impartiality on matters of political or industrial controversy and matters relating to current public policy. "Due" means adequate or appropriate to the subject and nature of the programme.

Core Obligations

- 1. Due Impartiality:** Not absolute equal treatment, but appropriate to the subject matter
- 2. Due Accuracy:** Adequate accuracy in reporting
- 3. Editorial Independence:** Independence from government and commercial interests

Regulatory Authority

- Ofcom (Office of Communications): External regulator with sanctioning powers
- BBC Board: Internal governance

Complaints Procedure

1. BBC Complaints (internal, three-tier)
2. Ofcom (external complaint after exhausting internal routes)
3. Judicial Review (High Court)

The following books are available from SVFAB

Orders via www.svfab.ch or kontakt@svfab.ch

Unbalanced Reporting is the response to the halving initiative in Switzerland: Manipulation techniques are explained in detail, starting with the selection of staff and sources. Then 15 principles are explained: omission, framing, temporal framing, guilt by association, emotionalisation, context removal and many more, illustrated with numerous examples. Additionally, it becomes apparent where we ourselves apply these techniques – fostering not only awareness but also empathy.

Optionally the book comes with **playing cards**.

Also available as an **audiobook**.

The interview is not a conversation. It is a stage – and someone else has written the script.

Those who don't know this deliver material. Good quotes that get cut wrong. Correct statements that end up in the wrong context. Honest answers framed as confessions.

This book is not a media criticism book. It is a toolbox – for everyone who faces a microphone and wants to know what to do about it. 7 chapters. 7 tools: What an interview really is. The 7 most common traps. The three principles of sovereignty – anchoring, reframing, setting boundaries. Preparation in one hour. Body and voice. What to do when things go wrong. And what matters after the interview.

For politicians, activists, entrepreneurs, whistleblowers – for everyone who is in the public eye and wants to understand how the game works. So they stop playing along – and start shaping it.

In A5 format. Direct. For preparation, reference, follow-up and when difficulties arise

You think you see the world. In reality you see the frame someone has placed around it. Framing is the oldest and most elegant manipulation technique in the world. It doesn't change the facts – it changes what we make of the facts. How we feel. What we believe. How we decide. And it works – because we all play along. Every day. Unconsciously. You too. This book is not a dry textbook. It is a workbook – playful, direct, full of real-life examples. You don't just learn how others frame you. You learn how you yourself frame – and how you can use it consciously and fairly.

Because whoever understands framing sees the world more clearly. Hears news differently. Conducts conversations more confidently. And no longer so easily accepts a frame chosen by someone else.

Schweizerischer Verein für ausgewogene Berichterstattung
Association suisse pour une information équilibrée
Associazione svizzera per un reporting equilibrato

With many exercises and concrete examples from politics, media and everyday life – and the occasional smile.

Framing with style. Because the frame changes everything.
